Keyboard KBPC SX
Standard keyboard for business users

Issue October 2004

Pages 2

The new Fujitsu Siemens Computers standard keyboard KBPC SX leads the way to future regarding typing convenience and reliability. It offers latest technologies and an innovative design.

With combined USB and PS/2 technology, it is well prepared for every modern interface.

Ergonomically optimised keys with a rough surface and a clear defined pressure point convey a pleasant and secure typing feeling at any time.

The standard keyboard KBPC SX convinces every user due to the flat, space-saving design as well as the excellent price-performance ratio and therefore presents the optimum solution for standard PC applications.

Usability
- Connects to every PC with standard PS/2 and USB interface
- Space saving design for your workplace

Ergonomics
- Stress free and effective use through high contrast keys, ergonomic key design and a soft pressure point.

Tailor-made
- Customize your keyboard with a specific logo plate design
- Specific keycap inscriptions, also in different colors, for your specific designs

Reliability
- High quality and function stability through in-house development and manufacturing
- Short reaction and transportation time
- Warranty, service and spare part supply according to your needs

Modern production technology
- Abrasion-proof keys by using laser printing technology for the keycaps
- Fully automated production line
- Highest quality coupled with the best price/performance ratio guaranteed

Environmentally friendly development
- Recycling friendly by easy separation into recyclable components
- Minimized size and weight in combination with minimized use of raw materials.
